## Classifying Partnerships

### Low

#### Early Stage Collaboration

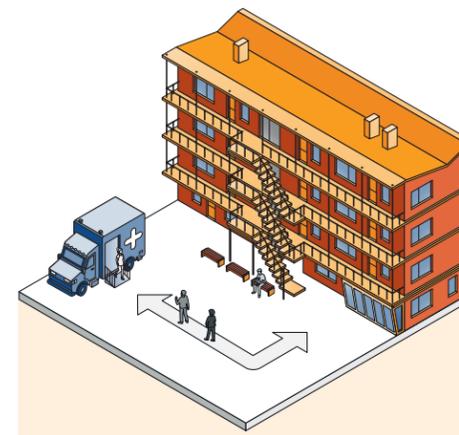

- ⊕ No formal partnership between the organizations
- ⊕ Referrals based/maintaining a resource directory
- ⊕ Assistance with housing program applications
- ⊕ May or may not have a designated team member to manage referral network relationships
- ⊕ Not a participating member of the Homeless Continuum of Care

### Moderate

#### Good Collaboration

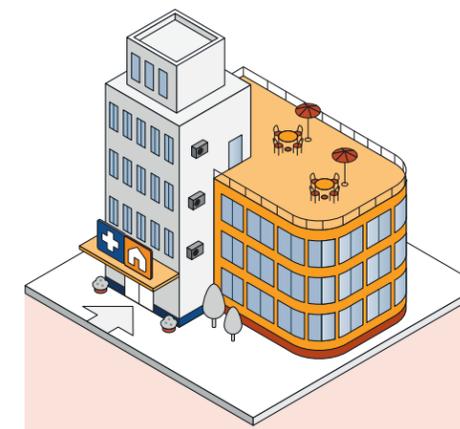

- ⊕ Care coordination
- ⊕ Joint care planning
- ⊕ Independent operations, but may pursue joint funding opportunities
- ⊕ Dedicated staff to maintain referral network relationships
- ⊕ Participating member of the Continuum of Care

### High

#### Better Collaboration

- ⊕ May have formal partnership agreements
- ⊕ Co-location of health services and housing (mobile or onsite at housing)
- ⊕ Joint operations with retained autonomy of each organization
- ⊕ Active member of the Continuum of Care, ideally in board or committee leadership

### Highest

#### Best Health and Housing Collaboration

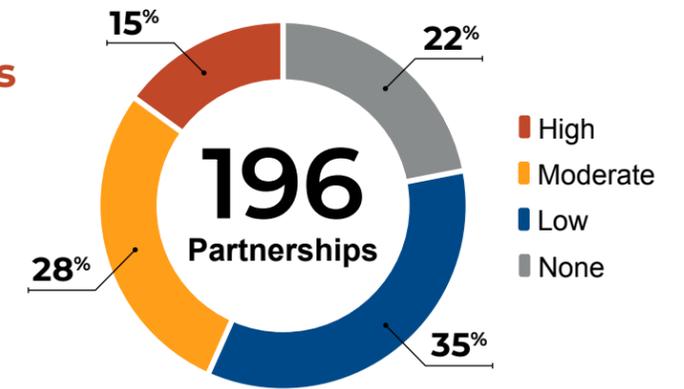

- ⊕ Full-service integration (co-located housing and health facilities)
- ⊕ Single point of entry/integrated assessment
- ⊕ Joint case planning
- ⊕ Integrated resources

## CSH Data on Health and Housing Partnerships

Participant data from CSH Training and Technical Assistance activities shows that only **15% of health centers have a “high” level of partnership** with their housing sector, **35% have a “low” level of connection**, and **22% have no connection to their local housing sector.**

PERCENTAGE BY CLASSIFICATION
